

Cisco Career Certifications

November 12, 2002

Dear Jason Israel,

Congratulations! You have successfully achieved your Cisco Career Certification!

By choosing to extend your knowledge and strengthen your professional credentials through Cisco Career Certifications, you join ranks with other highly trained networking professionals. Your new certification level validates you as an expert in the use of Cisco products in the networking environment.

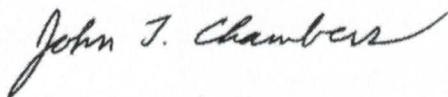

Cisco provides an on-line tracking system to help you monitor your certification progress and to help you stay up-to-date with program enhancements and new offerings. To access the Cisco Career Certifications Tracking System, go to www.cisco.com/go/certifications/login. Follow the instructions on the screen to gain entry to the database.

Now that you are Cisco Career Certified, you can download the appropriate logo for your business card, letterhead or other promotional materials. (See the sample below of a logo on a business card.) To download your logo, go to the Cisco Career Certifications Tracking System. Once logged in, locate the Cisco Career Certification tab under the Cert Progress button on the left-hand side of the page. Choose the Get Logo option and follow the directions.

If you have any further questions, visit our Certifications Online Support at www.cisco.com/go/certsupport.

Again, congratulations on earning a Cisco Career Certification. We look forward to an on-going relationship with you as you continue to expand your networking expertise and use Cisco Internet solutions.

Best wishes on your continued success.
