To Whom it may concern,

Jason Israel has been an incredible asset, colleague and IT consultant for NCR/Teradata/ITS. Ever since I have worked with him he has taken the utmost diligence and professionalism in all projects that he has been associated with. He has successfully lead projects, implemented, and administered several projects with the Teradata and ITS infrastructure upgrades, etc... He is a valuable asset to anyone that gets a hold of him.

Any great company should take great consideration in hiring the seasoned professional.

Regards,

Craig A Sayler
