

Jason B. Israel

Senior Network Engineer & AI Strategist

Senior Network Engineer with over 15+ years of specialized expertise in network design, security, route, switch, wireless, and VoIP solutions. Proven ability to align business objectives with state-of-the-art technical solutions, enhancing operational efficiency. As I transition to integrate the potential of ethical artificial intelligence in network management, my dedication to mentorship and collaboration remains constant, making me not just a technical asset but also a trusted partner for executives and a guiding force for teams.
